

I don't believe LPFM stations should take priority over current FM translator service. Currently, FM translator service carries the signal for Airl, one of the best and most positive radio stations around, on FM 88.9, 90.7, and 95.9, in my area. I listen to Airl all the time and feel encouraged by the positive and uplifting programming that they provide. I also feel that Airl has a positive effect on the community by promoting positive Godly values through contemporary music that is encouraging and inspiring. I feel that if Airl were to be displaced by a LPFM broadcaster providing other programming, the impact on the community would be largely negative.

There are very few radio stations out there that have documented evidence that their effect on the community is positive, but Airl is one of them. Every week, there are many people who call in to the radio station and give testimonies of how the music and other programming on Airl has encouraged them, challenged them, and inspired them. I urge you to consider carefully the impact of preempting radio stations such as Airl with other programming. I feel, and I think many people would agree with me, that the value provided by Airl is too great to allow other programs on LPFM to override their air time. Please don't allow LPFM stations to preempt Airl programming currently broadcast on FM translators.

Thank you for your time in considering my comments. If you have any questions, please feel free to contact me.
